As a dedicated software engineer, I am passionate about staying at the forefront of emerging technology trends. My philosophy in web development is encapsulated by the quote, "Great web design without functionality is like a sports car with no engine." This drives my commitment to creating high-quality websites that prioritize both user-friendliness and robust functionality.

With extensive experience in both frontend and backend development, my professional expertise lies in crafting scalable web applications. I thrive in collaborative environments where I can leverage my skills in code review, deployment automation, and performance optimization to deliver exceptional results.

Key Skills

- Javascript / Typescript
- React / Nextjs
- Nodejs / Nestjs
- Python
- Django
- Azure Devops
- Figma

Professional Experience

February 2024 -
Present

Founding Engineer

Hatch Inc., Montreal, Quebec, Canada

- Co-lead technical team in the development of a comprehensive loan management system for both personal and business loans.
- Collaborate directly with stakeholders to gather requirements, define project scope, and ensure alignment with business objectives.
- Design wireframes and mockups using Figma, translating requirements into visual designs for user interfaces and experiences.
- Manage end-to-end code base activities including code reviews, ensuring adherence to coding standards and best practices.
- Orchestrate deployment pipelines from development through to production, ensuring seamless and reliable releases.

September 2022 -
November 2023

Software Engineer

Rocketplace, Vancouver, British Columbia, Canada

- Maintained and optimized existing software systems, resolving bugs and improving system reliability and security
- Collaborated with a cross-functional team to design and deploy new features for web applications, resulting in a 20% increase in website performance.

March 2022 -
September 2022

Frontend Developer

Resilience Corporate Services, Toronto, Ontario, Canada

- Exclusively responsible for frontend development
- Collaborating closely with TradeX's data scientists to create a web application visualizing the arbitrage vehicle platform.

October 2021 - July
2022

Data Engineer

InterU Network Inc, Vancouver, British Columbia, Canada

- Developed and maintained scalable data pipelines to process and analyze large volumes of data
- Optimized database performance and query execution to improve overall system efficiency

Education

Bachelor of Science - BS in Information Technology

Fairleigh Dickinson University, Vancouver, BC | January 2021 - May 2024

- Received Honor's List certificate every semester for outstanding academic achievements.
- Graduated with highest honor: Summa Cum Laude
