SUMMARY

Full stack software engineer with 6 years of shipping. Founding Engineer at Hatch, where I built an automated application processing platform for lenders (IDV, KYC, KYB, IBV, background checks) from the first commit and now guide a team of 7+ engineers through it. Concurrently building pricing and operations software at S&T Properties, including a price-prediction model and a property management system that unifies every online travel agency. Strongest in TypeScript, React, Next.js, Node, NestJS, PostgreSQL, Python and Figma.

EXPERIENCE

Founding Engineer · Hatch Inc. · Montreal, QC (remote) Feb 2024 – Present

- Built the automated application processing platform from the first commit: identity verification (IDV), KYC and KYB checks, instant bank verification (IBV), background checks, and the decisioning and admin tooling around them.
- Guide a team of 7+ engineers through the codebase: onboarding, code review standards, and architecture decisions.
- Work directly with founders and stakeholders to turn business goals into scoped, shippable work; design wireframes in Figma, then build them.

Full Stack Software Engineer · S&T Properties Inc. · Calgary, AB Apr 2024 – Present

- Build internal software for the pricing team, including a price-prediction model that informs pricing decisions and improved revenue.
- Build internal tools for the operations team that streamline day-to-day property operations.
- Building a property management system that brings every online travel agency the company lists on into one system.

Software Engineer · Rocketplace Inc. · Vancouver, BC Sep 2022 – Nov 2023

- Designed and deployed new web features with a cross-functional team, resulting in a 20% increase in website performance.
- Revamped the dashboard and portfolio pages, leading to a 10% increase in signups.

Frontend Developer · Resilience Corporate Services · Toronto, ON Feb 2022 – Sep 2022

- Sole frontend developer; built a web application visualizing TradeX's arbitrage platform alongside its data scientists.

Data Engineer · InterU Network Inc. · Vancouver, BC Oct 2021 – Feb 2022

- Built and maintained scalable data pipelines for large-volume analysis and optimized database performance and query execution.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python

Backend: Node, NestJS, GraphQL, Django

Frontend: React, Next.js, Redux, React Native

Data: PostgreSQL, MySQL, MongoDB, Redis

Infra and delivery: Docker, Azure DevOps, Google Cloud, Firebase

Design and UI: Figma, Chakra UI, Material UI, Framer Motion

EDUCATION

BS Information Technology · Fairleigh Dickinson University · Vancouver, BC Jan 2021 – May 2024

Summa Cum Laude · Honor's List every semester
